

WEN WEN COIN (WEN) – A GLOBAL MEME COIN MOVEMENT

ONBOARDING THE MASSES, ONE WEN AT
A TIME

2025

About us

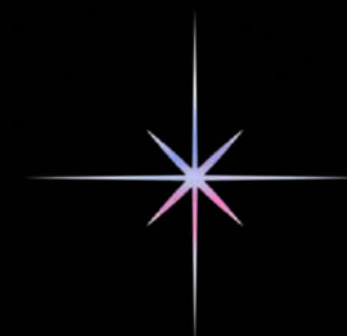

Wen is culture. Wen is a movement. Wen is the internet's cutest cat and the heart of a growing global phenomenon. More than a brand, Wen is on a mission to become one of the world's most iconic and beloved IPs.

Wen is a Solana-based memecoin that originated from a poem "A Love Letter to the Wen Sisters." Written by Meow, the pseudonymous creator of the Jupiter decentralized exchange (DEX), the poem was the first NFT to be minted using the WNS standard and then split into tradable tokens.

The WEN memecoin was developed by the Jupiter team before airdropping Jupiter's native token, JUP, to DEX users.

The WEN token can be used as a governance token to tip creators online and for the Wen decentralized autonomous organization (DAO) to vote on decisions regarding the future of the DAO.

Mission

The mission of Wen Wen Coin is to onboard millions of users into the world of crypto and Web3 through a fun, fair, and inclusive meme-based ecosystem. Launched as a pure community project with no allocations to insiders, influencers, or venture capitalists, Wen sets itself apart by staying true to decentralization and transparency. With over 1 million wallets included in the original airdrop, the project was designed from day one to be accessible and widely distributed.

Vision

To become the world's most iconic, community-owned, and culturally resonant internet IP—uniting users globally through humor, inclusivity, and the power of decentralized ownership. Wen Wen Coin envisions a world where memes, culture, and technology intersect to form a new kind of global identity. Just as internet-native communities have reshaped entertainment and finance, Wen seeks to lead the charge by turning a meme into a movement—one that is accessible, fun, and foundational to the next generation of internet-native economy.

WHY US

In a crypto space saturated with short-lived hype and centralized control, Wen Wen Coin stands out as a truly community-first project with no insiders, no early investors, and no gatekeepers. We believe that ownership, influence, and opportunity should be accessible to all—not reserved for a privileged few. That's why over 70% of our supply was airdropped directly to the public, reaching more than 1 million wallets from day one.

But we are more than just fair tokenomics. We are building a culture. Wen is a symbol of internet-native identity—playful, irreverent, and deeply connected. Backed by a strong community and driven by open-source innovation, our contributions like the Wen New Standard (WNS) for NFTs reflect our commitment to building lasting value on the Solana blockchain and beyond.
